Here are my thoughts on this as well +1 for the excellent 'Krdp' application, which I think is now called 'Krdc' (Remote Desktop Connections Client) in Linux Mint 18 and is available in the Software Manager or Synaptic Package Manager (SPM), see screenshot below.. There is also 'Krfb' for desktop sharing +1 for 'Remmina' as well which has a lot of great plug-ins available in the Software Manager or Synaptic Package Manager (SPM) as well, search for 'remmina', click to install, then right click to see recommended and suggested packages.
